Myths & Truths About Sickle Cell Disease

Free Informational Event
Thursday, September 24, 2015
7:00 PM

UNION BAPTIST CHURCH
31 Manhattan Avenue
White Plains, NY 10701

Affecting mainly African Americans, Sickle Cell Disease is a chronic and debilitating illness that leads to multi-organ failure and premature death. Approximately 100,000 people suffer from SCD in this country each year.

Event Facilitator:

Dr. Mitchell S. Cairo,
*Chief of Pediatric Hematology,
Oncology and Stem Cell
Transplantation
Maria Fareri Children's
Hospital*

Panel Discussions:

Subject matter experts will focus on four areas of public interest:

- Pain Management
- Stem Cell Transplantation
- Gene Therapy
- Blood Transfusion
